Purchase Power Exchange, LLC is the first and only company to offer a Virtual Chief Product Procurement Officer (Virtual CPPOSM) to manage and monitor product spend and supply chain activities.

Virtual CPPO integrates a prequalified network of suppliers and strategic partners to offer a total solution with *cradle to grave visibility, tracking and reporting to all parties*. Configurable parameters to monitor and report contract and service level agreements *give buyers and suppliers the power* to track end-to-end activities and proactively manage the supply chain to avoid breaches and meet performance objectives.

Features:

- o Secure web based portal
- o Fully automated processes
- o Transaction history & audit trails
- o EDI transaction processing
- o Real-time reporting
- o Comprehensive supplier scorecards
- o Compliance controls & alerts
- o Standard API's
- o Total redundancy

Benefits:

- o Secure access
- o Complete transparency
- o Real-time insight & information
- o Optimal contract compliance & performance
- o Proactive management of potential issues
- o Seamless integration or standalone use
- o Automation of smaller paper-based suppliers

Our SaaS solution, which requires *no capital expenditures*, may be integrated with our client's enterprise systems or used as a standalone application. Standard API's allow *seamless integration/punch-out* to customers accounting and order entry systems.
